Summary

Motivated Frontend Developer equipped with a solid background in HTML, CSS, JavaScript and React along with hands-on experience in building responsive design. I am eager to bring my technical skills, creativity and enthusiasm for frontend development to a challenging and collaborative environment where I can contribute to innovative projects and enhance my abilities as a frontend developer.

ACADEMIC DETAILS

Year	Degree/Exam	Institute	GPA/Marks%
2017 - 2020	B.SC - Information Technology	University Of Mumbai	8.23
2015 - 2017	HSC	D.G. Ruparel College	71.08
2015	SSC	Maharashtra Board	91.20

WORK EXPERIENCE

Mainframe Operator — Kyndryl, Bangalore [June 2021 - Present]

- Proactively monitored system performance and executed scheduled jobs using CA7 and OPCA.
- Created and scheduled batch jobs using TWS following established procedures and job dependencies to ensure smooth execution of critical business processes.
- Built and maintained application workflows within TWS, integrating job dependencies, scheduling requirements, and optimizing for resource constraints.

OTHER PROJECTS

Entertainment Web Application - React JS, Redux, CSS3 [Live URL](#)

- This project is an entertainment application that utilizes The **MovieDB** API to showcase a variety of TV series and movies across various categories. Users get personalized suggestions based on their current choices. Plus, there's an advanced search bar for effortlessly finding specific titles. Used **redux toolkit** for state management.

REST Countries API with Color theme switcher – JavaScript , CSS3 [Live URL](#)

- Users can effortlessly view all countries listed from the API directly on the homepage, search for a specific country using an input field, and filter countries by region. Clicking on a country reveals more detailed information on a separate page, while also providing the option to navigate to its border countries. Additionally, users have the flexibility to toggle between light and dark mode to customize their viewing experience according to their preference.
